

AHMED HELMY

PRODUCT DESIGNER | UI/UX | MOTION GRAPHICS

ABOUT ME

With 18 years of experience, I create user-centered digital products combining Product Design, UI/UX, Motion Design, and Front-End Development. I bridge design and implementation using AI workflows to deliver quality experiences.

Work Experience

DevOps Solutions
Senior Product Designer (UI/UX)

Leading end-to-end product design, from understanding business goals and user needs to creating intuitive flows, interactive prototypes, and polished interfaces. Collaborating with product and development teams to build scalable design systems, improve usability, and deliver consistent, responsive experiences across web and mobile.

2021 - Present

Communications, Space & Technology Commission
Riyadh - Saudi Arabia

Senior Product Designer (UI/UX)

Designed and improved digital government and enterprise platforms, translating complex requirements into accessible, user-centered experiences through research, prototyping, and interface design while ensuring usability and consistency across responsive services.

2020 - 2021

Global Arabian for Modern Applications (GAMA)
Jeddah - Saudi Arabia

Senior Product Designer (UI/UX) Front-End Developer

Designed enterprise applications, dashboards, and responsive web solutions, translating complex business requirements into intuitive user journeys, prototypes, and production-ready interfaces. Bridged design and front-end implementation to ensure responsive, consistent, and high-quality digital experiences.

2016 - 2020

Tech Heights Agency
Lead Product Designer (UI/UX)

Led the design team in delivering websites, web applications, and digital products for multiple clients. Established design standards, guided designers, and collaborated with development teams to ensure high-quality implementation and consistent user experiences across projects.

2011 - 2016

Digital Chains IT
Senior UI/UX Designer

Designed user interfaces for enterprise systems, portals, and corporate websites, focusing on usability, visual hierarchy, navigation, and consistency. Created structured layouts and reusable UI components while collaborating with technical teams to ensure smooth and accurate implementation.

Work Experience

Alrida Information System & Computing Ltd.

UI Designer & Front-End Developer

Designed website interfaces and converted approved visual concepts into functional front-end pages. Worked with HTML and CSS to build structured layouts, improve browser compatibility, maintain visual consistency, and create clear, user-friendly experiences for corporate and business websites.

2008 - 2009

Alawael IT House

Digital Designer

Created website layouts, graphic assets, branding materials, promotional designs, and digital content for web and print. Supported early-stage interface design by preparing visual concepts, page elements, banners, and marketing materials aligned with client requirements and brand identity.
